

November 9, 2020

To our sweet patients at California Pediatrics,

It is with a heavy heart that we announce the closure of California Pediatrics on 12/31/2020.

The COVID pandemic has placed a significant economic burden on medical practices across the country, including our own. This financial strain is something that we can no longer sustain. Please know that California Pediatrics took every measure possible to remain open and available to you during this difficult time.

We would like to thank you for the trust that you have placed in us over the years. It has been a privilege to care for you and we have loved watching you grow!

It is important that you continue to receive appropriate medical care and preventative care--do not let COVID interfere with this! The providers at California Pediatrics will disclose their future practice location in the weeks to come. In addition, we can provide you with referrals to kind and caring pediatricians in the area and will forward your health care record once we receive permission from you to do so.

You can contact us for a medical records release form:
